PROFESSIONAL SUMMARY

Motivated MCA student with hands-on internship experience in Data analytics and Web development. Skilled in Python, SQL, Power BI, PHP, and web technologies, with a proven track record of building interactive dashboards and responsive web applications. Seeking an entry-level position to apply analytical and technical skills to drive organizational goals.

INTERNSHIP EXPERIENCE

Data Analyst Intern, *Codveda Technologies* 07/2026 – 08/2026
- Performed data cleaning, exploratory data analysis, machine learning, and sentiment analysis using Python to derive actionable insights from datasets.
- Developed interactive Power BI dashboards and data visualizations to present analytical findings effectively.

Business Analyst Intern, *Saiket Systems* 07/2026 – 08/2026
- Conducted end-to-end Customer Churn Analysis using Python, including data cleaning, EDA, customer segmentation, and business insights.
- Developed an interactive Power BI dashboard with KPI cards, charts, slicers, and actionable business recommendations.

Data Analyst Intern, *Innobyte Services* 04/2026 – 05/2026
- Built interactive Power BI dashboards using 100K+ sales records.
- Performed EDA and generated business insights using Excel and Power BI.

Web Developer Intern, *Manipal Institute of Technology* 05/2026 – 09/2026
- Developed a web-based faculty management portal using React.js, Django, and Firebase for managing faculty profiles, activities, and academic events.

EDUCATION

Bachelor of Computer Applications, *Bhandarkars Arts & Science College* 2021 – 2024 | Kundapura
CGPA: 9.20

Master of Computer Applications, *Poornaprajna Institute of Management* 2024 – 2026 | Udupi
CGPA: 8.63

TECHNICAL SKILLS

Python, Java, SQL, Microsoft Excel, React, Node.js, Microsoft Office, Dashboard Development, Power BI, Data Analysis, VBA, CSS, HTML, JavaScript, TypeScript, Debugging, Object-Oriented Programming, Django, REST APIs, PostgreSQL.

CERTIFICATES

- NPTEL Machine Learning, NPTEL Joy of Computing.
- Deloitte Cyber Security Job Simulation.
- Infosys Springboard PHP, Big Data 101 and 201
- Digital Productivity with AI

PROJECTS

Doctor Appointment System, *Tech : HTML, CSS, PHP*

Developed a full-stack PHP/MySQL web application enabling patients to book medical appointments online and doctors to manage requests through an admin dashboard with real-time statistics, approval workflows, and reporting capabilities.
GitHub

Employee Leave Management System, *Tech : HTML, CSS, PHP*

Developed a PHP/MySQL Employee Leave Management System with role-based access for employees and administrators. Implemented secure authentication, leave approval workflows, employee management, and reporting features with a responsive web interface.
GitHub

Blood Donation App (LifeLink), *Tech : Java, XML*

Developed a complete Android application connecting blood donors with recipients, featuring user authentication, donation tracking, and emergency blood request management using SQLite database and Material Design UI.
GitHub

Agro-Connect, *Tech : Django, Python, HTML, CSS*

Django-based agricultural platform connecting farmers, holders, managers, and delivery personnel with features for food product management, purchase tracking, Google OAuth authentication, email notifications, Razorpay payments, and Google Calendar meeting scheduling.
GitHub

Faculty and Adjunct Faculty Portal , *Tech : React, Python Django, PostgreSQL*

Developed a centralized web portal to manage faculty records, academic activities, leave applications, examination duties, subject allocation, timetables and adjunct faculty activities, simplifying college administration and reducing manual work.
